

What Is SafetyGel® Used for?

Sachets

Pads

Granules

Wards / Carehomes

Add a sachet, pad, or loose granules to bedpans and other waste receptacles to control the odour and infectious risk of vomit and urine.

- ◆ Solidify patient waste for easy disposal
- ◆ Prevent spills and leaks
- ◆ Reduce infectious risk
- ◆ Capture unpleasant odours

Vomit
Bags

Ambulances

Keep SafetyGel® vomit and urine bags in your ambulance stock to improve infection control, patient care quality and staff wellbeing.

- ◆ Absorb and contain up to 1000ml
- ◆ Adhesive seal prevents spills
- ◆ Reduce infectious risk
- ◆ Capture unpleasant odours

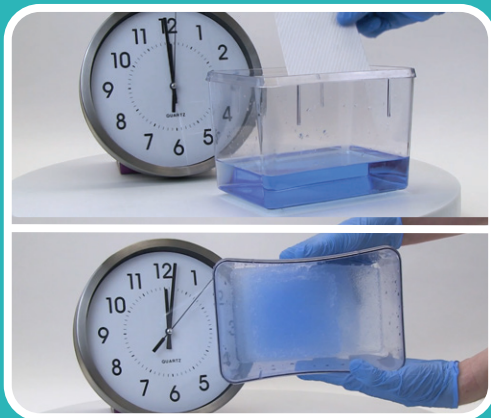

Vomit
Bags

Commercial Travel

Provide ill or travel-sick passengers with premium quality vomit bags to safely contain the contents while capturing bad odours.

- ▶ Absorb and contain up to 1000ml
- ▶ Improve the passenger experience
- ▶ Prevent odour spreading to other passengers
- ▶ Reduce infectious risk

Medication Disposal / Drug Denaturing

Use SafetyGel® granules, pads, or sachets to safely denature expired or excess controlled drugs. SafetyGel® 2g sachets make an ideal core component for a drug denaturing kit.

Tablets and capsules can be pre-dissolved in water then mixed with the gel and discarded.

- ▶ Renders liquid medicines unusable
- ▶ Activates instantly upon contact with fluid
- ▶ Meet disposal requirements
- ▶ Improve waste handling and control

Sachets

Pads

Granules

Sachets

Pads

Granules

Clinics / Laboratories

Quickly control hazardous spills such as from fluid samples or dangerous chemicals.

Use 2g sachets or pads for small spills, and loose granules for larger ones.

- Takes less than 60 seconds to absorb
- Speed up cleanup
- Reduce infectious risk
- Improve staff safety and wellbeing

Sachets

Pads

Tattoo Parlours / Sharps Waste

Add SafetyGel® sachets or pads to any sharps container to prevent spills and leaks and improve your hazardous waste control.

Also intended for tattoo artists to solidify used Rinse Cups, reducing infectious risk.

- Suitable for any size of sharps container
- Water-soluble seal for rapid activation
- Reduce infectious risk
- Improve staff and patient safety
