Product Information Sheet

Super Absorbent Fast-Acting Sachets

1.2 Litre Absorption - Box of 100

Your fast-acting solution for absorbing and solidifying liquid waste - in hospitals, care homes, clinics, and at home.

Product Description

Each SafetyGel 7g sachet contains our super absorbent granules, rapidly absorbing and solidifying up to 1.2 litres of liquid, including urine, vomit, and blood, for secure disposal.

The patented water-soluble seal dissolves upon contact with liquid, ensuring quick activation without having to tear the sachet. This larger, versatile sachet size is ideal for use in bedpans, urinal bottles, commodes, sharps containers, and other clinical or care receptacles.

Upon contact with fluids, SafetyGel granules immediately activate, solidifying and absorbing liquid and odours while minimising the risk of spills, leaks, or cross-contamination.

Each box contains 100 sachets, providing a reliable supply for hospitals, aged care, clinical, or home settings.

Product Features

- **Rapid Absorption:** Within 60 seconds, each sachet fully absorbs and solidifies up to 1.2 litres of fluid, including urine, vomit, blood, and other hazardous liquids
- **Patented Water-Soluble Seal:** The sachet's water-soluble seal dissolves instantly upon contact with liquid, ensuring quick activation without tearing the sachet
- **Convenient Packaging:** Supplied in boxes of 100 sachets, ensuring a steady supply for hospitals, care homes, clinics, and home use
- **Easy Disposal:** Solidified waste can be safely disposed of without the risk of spills or leaks, safeguarding healthcare professionals, patients and staff
- **Improved Infection Control:** Reduces the risk of cross-contamination, promoting secure and hygienic disposal
- **Improved Patient Dignity:** Ideal for aged care, incontinence care, and quick clean-up in healthcare settings, helping to maintain dignity and comfort for patients

Directions for Use:

1. Place the required number of sachets into the receptacle before use. Each 7g sachet absorbs up to 1.2 litres of liquid.
2. When fluids come into contact with the sachets or loose granules, the solidification process activates.
3. Once fluid has solidified, dispose of contents via the appropriate clinical waste channel or your local disposal route. Always follow local, regional, or national waste disposal guidelines.

Non-Toxic & Non-Irritant | WARNING: **DO NOT EAT** | CHOKING HAZARD
